

## UNIWEB Time: THE INTRANET SOLUTION

What does a company need to be successful today? Flexibility. Flexibility means flexible time, outwork, professional activities interruption, part time. In one word, a real nightmare for the Human Resources department. The only way to achieve this is to install a computerized, flexible and friendly time management IT solution.

Using the Internet technologies, UNIWEB Time offers you the flexibility and the user-friendliness of an up-to-date time and attendance system using your existing IT infrastructure. UNIWEB Time allows a simple and quick enquiry, handling and management of data available in the UNITIME Time and Attendance database. And this, simply through a standard [Internet explorer](#) module.

Fully integrating the last communication technologies, UNIWEB Time combines on a smooth way the needs for optimizing the complex time and attendance needs of the day and the staff request for transparency.

## UNIWEB Time: The only way to decentralize the management of your staff working time

Every [user](#) or [supervisor](#) is authenticated by his ID and password. Depending of his security profile, the user or the operator is able to display all or specific data available in the UNITIME database, such as his personal record, his due balance, his scheduled off-time, his off-time balance, his future work schedule, the details of his past services and many other necessary data.

UNIWEB Time allows staff to submit easily his request for holidays, to be confirmed or not by a department head.

Furthermore, the optional UNIWEB-Clocking module, allows you to set up a virtual punching machine system, to be used by the staff wherever they are: in your facilities, being on the road or working at home.

UNIWEB Time, a step forward for a successful and friendly time management...!
