
UNICARD

For personalising your cards

Unicard can allocate a card layout specific to employees, visitors or suppliers. Using Card Designer, you can configure the card and label templates that will be used in Unicard.

Whether for standard cards or single-use cards (bar code type), it is up to you to arrange the photo, surname, first name and any relevant information about the people who use your facilities. The information can either be entered manually via the system or retrieved directly from the database shared by all our software. The information can also be downloaded based on the person's electronic identity card.

All you have to do in Unicard is select the person the card is for, allocate the defined layout and print the card, either individually or in batches.

Unicard's visual identification reassures your security staff and increases security within your buildings.

WHY IMPLEMENT A CARD PRINTING SOLUTION?

- A flexible system for designing and allocating cards simply and efficiently
- A customised welcome for visitors from outside the company
- Visual identification for staff and visitors
- Quality enhancement for your security
